THE ENVIRONMENT AND VISTELLE

Vistelle is formulated to have as minimal impact on the environment as possible.

The Vistelle manufacturing process does not release any harmful emissions to the environment. Vistelle is hygienic and does not promote bacterial growth or transmission making it a safe and healthy choice for your home.

CLEANING VISTELLE PANELS

Because Vistelle is user friendly and environmentally engineered we have created a surface that does not need harsh chemicals or effort to clean it.

With Vistelle, cleaning is simple. Best results are achieved by using a soft micro-fibre cloth or chamois with a non-abrasive soap or common household detergent in warm water.

A hard coated outer layer protects Vistelle shower / bathroom panels against scratches.

With Vistelle, soap scum, calcium build up, mould and bacteria can be simply wiped away – no need for harsh chemicals.

Vistelle® panels are easy to work with and can be installed rapidly over new or existing wall finishes.

Why have a wall panel that is heavy, costly and can't be cut or shaped by you? Vistelle is lightweight, waterproof and can be easily cut, drilled and shaped with standard wood working tools.

Vistelle is a beautiful, high gloss alternative to tiles and glass. A single panel can be installed in a fraction of the time of tiles and is much more affordable than glass. Vistelle looks great in any room - not just bathrooms and comes with a 10 year indoor UV warranty.

Vistelle - Styled by You!

VISTELLE COLOUR RANGE

With six modern décor colours available in the range - Vistelle is a beautiful home renovation acrylic alternative to tiles and glass panels.

Style your home with Vistelle – and forget all the hassle!

VISTELLE INSTALLATION GUIDE *

Vistelle is so easy and quick to install into any bathroom or vertical wall application - adding great value and style.

INSTALLATION MATERIALS:

- Neutral cure translucent silicone 1 x 300g tube per panel
- Double sided mounting tape 12mm wide - 8 metres of tape per panel

1. TOOLS & MATERIALS:

- Power saw, jigsaw, drill, sandpaper, protective equipment, neutral cure silicone, a spatula and double sided tape.

2. AREA PREPARATION:

- Ensure the walls are smooth, clean and dry. All substrate wall linings must be sealed at the joints with silicone or waterproofing compound.

3. MEASURING & MARKING OUT:

- Measure the walls and mark up the panels.

4. CUTTING:

- Use a circular or table saw with fine tooth blades for straight cuts.
- Use hole saws and twist drills for all openings.
- Use blunt drill bits when drilling Vistelle.
- Jigsaws with fine tooth blades can be used for short and curved cuts.
- Always use sacrificial material underneath Vistelle when cutting or drilling.

5. EDGE FINISHING:

- All sawn edges must be sanded or planed smooth prior to installation of Vistelle panels.

6. PANEL INSTALLATION:

- Scuff the rear colour surface with coarse scouring pad or 120 grit sandpaper.
- Apply a 6 mm bead of translucent neutral cure silicone in a wavy pattern between each tape strip.
- Run a bead of silicone on the rear of the panel around any holes or cut outs.
- Seal the joints with neutral cure wet area silicone. Once gap is filled, remove excess silicone using a soft flexible plastic spatula.
- After the silicone is applied, remove the outer protective film or masking tape in one continuous movement to achieve the best finish.

* Always refer to instructions contained in Vistelle box
